

14" Pizza Aluminum Screen

Brand: Sodeno's Quality Brand

Product Code: SO-WR-14SCR

Availability: 50

Weight: 0.10lb

Dimensions: 0.00cm x 0.00cm x 0.00cm

Price: \$9.95

Short Description

Get MORE for LESS! Consistent results every time! Will NOT require lifetime maintenance. Will NOT break if dropped. Will SIGNIFICANTLY reduce long cooking times. Require LESS gas, charcoal, wood, or electricity because of the reduced baking process.

Description

Produce delicious, evenly baked pizza with the help of this 14" aluminum pizza screen!

A necessary tool for any pizzeria, this 14" aluminum pizza screen will help your pizza bake more evenly by allowing air to circulate beneath the crust! When you are looking for a way to get your thin crust pizzas perfectly done on the bottom, a pizza screen is a great option. Cutting pizzas on the screen is not recommended, but it is a great choice for serving pizzas because it allows air circulation under the crust to keep it from getting soggy.

Superior Heat Distribution

This screen is made of aluminum so that it heats up faster than stainless steel pans. With better heat transfer properties, this pan is ideal for reducing hash marks on food. This screen is also great for use in conveyor-type pizza ovens so you can get perfectly brown pizzas as quickly as possible.

Seamless Rim

This screen features a seamless rim design for durability. Since it is seamless, you can be sure of safer handling and cleaning by eliminating rough or bent edges.

Durable Construction

Made of sturdy aluminum, this durable pizza pan will last you through numerous servings. You won't have to worry about replacing this tray several times!

- Cooks pizza faster and more evenly.
- Extremely affordable. A screen can be purchased for a reasonable price.
- It will save you money by reducing the required wood, charcoal, or electricity.
- Made of non-toxic material.
- Very durable and harder to damage as the material is a metal, it will not break after suffering a fall.
- Offers great heat transfer. The transfer of heat is faster.
